Data to AI Workshop

*Proven methodology created by expert
Google Cloud Practitioners*

Data to AI Workshop Data Architecture for the AI Era

Transform your Google Cloud data architecture into an AI-optimized platform. Our workshop combines proven methodologies with hands-on guidance to accelerate your journey from raw data to production AI. This structured program helps you create scalable, secure foundations for machine learning and analytics.

Data to AI Workshop

Building AI-Ready Data Platforms on Google Cloud

Transform your Google Cloud data architecture into an AI-optimized platform. Our workshop combines proven methodologies with hands-on guidance to accelerate your journey from raw data to production AI.

Data Architecture

Design scalable data platforms aligned with Google Cloud best practices.

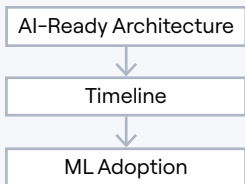

AI Integration

Connect data platforms to Vertex AI and GenAI services.

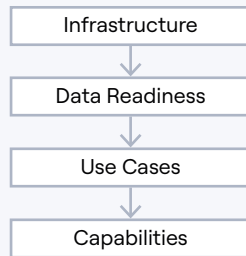

Workshop Flow

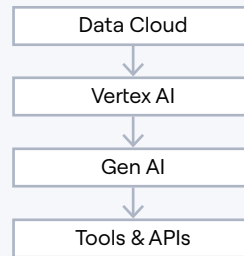

1 Architecture Design

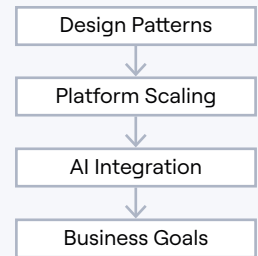

2 Product Deep Dive

3 Assessment & Use Case

4 Roadmap

Technical Outcomes

Reference architecture and implementation roadmap with security recommendations.

Business Impact

ROI projections and resource planning for successful AI adoption.

Why Zencore

Deep Technical DNA

Former Google Cloud architects who build production-ready AI solutions across industries.

Proven Results

Global enterprise customer success with predictive models and Gen AI implementations.

Accelerated Value

Reduce time-to-production through battle-tested methodologies and Google Cloud expertise.
